

2023 Stahlman Beekeeping E-mail Notes Issue #21a

I am including two pdf files this week. Both share thoughts on making money with bees. Beekeepers are special people. We all look at this world in different ways. I have often received emails regarding how one could increase the number of hives and how many hives does it take to make a living keeping bees.

My first instinct is to say enjoy your life. Appreciate the fact that we live in a free enterprise system. Anything is possible. Getting into any hobby business comes with risk taking.

For many of you, Issue #21 and the additional note may have little value. Honeybees have provided a living for many families. Honeybees are a source of additional income. But not everyone is going to feel the need to make money from their honeybees. The joy of working with honeybees is within all of us.
